Abstract
This research paper presents a novel study on document ingestion pipelines and retrieval a ugmented generation systems. This research paper presents a novel study on document ingest ion pipelines and retrieval augmented generation systems. This research paper presents a n ovel study on document ingestion pipelines and retrieval augmented generation systems. Thi s research paper presents a novel study on document ingestion pipelines and retrieval augm ented generation systems. This research paper presents a novel study on document ingestion pipelines and retrieval augmented generation systems. This research paper presents a nove l study on document ingestion pipelines and retrieval augmented generation systems. This r esearch paper presents a novel study on document ingestion pipelines and retrieval augment ed generation systems. This research paper presents a novel study on document ingestion pi pelines and retrieval augmented generation systems. This research paper presents a novel s tudy on document ingestion pipelines and retrieval augmented generation systems. This rese arch paper presents a novel study on document ingestion pipelines and retrieval augmented generation systems. This research paper presents a novel study on document ingestion pipel ines and retrieval augmented generation systems. This research paper presents a novel stud y on document ingestion pipelines and retrieval augmented generation systems. This researc h paper presents a novel study on document ingestion pipelines and retrieval augmented gen eration systems. This research paper presents a novel study on document ingestion pipeline s and retrieval augmented generation systems. This research paper presents a novel study o n document ingestion pipelines and retrieval augmented generation systems.

Methodology

We evaluate several chunking strategies including recursive character splitting and structure aware splitting. We evaluate several chunking strategies including recursive character splitting and structure aware splitting. We evaluate several chunking strategies including recursive character splitting and structure aware splitting. We evaluate several chunking strategies including recursive character splitting and structure aware splitting. We evaluate several chunking strategies including recursive character splitting and structure aware splitting. We evaluate several chunking strategies including recursive character splitting and structure aware splitting. We evaluate several chunking strategies including recursive character splitting and structure aware splitting. We evaluate several chunking strategies including recursive character splitting and structure aware splitting. We evaluate several chunking strategies including recursive character splitting and structure aware splitting. We evaluate several chunking strategies including recursive character splitting and structure aware splitting. We evaluate several chunking strategies including recursive character splitting and structure aware splitting. We evaluate several chunking strategies including recursive character splitting and structure aware splitting. We evaluate several chunking strategies including recursive character splitting and structure aware splitting. We evaluate several chunking strategies including recursive character splitting and structure aware splitting. We evaluate several chunking strategies including recursive character splitting and structure aware splitting.
